

ALARKO

MONOBLOC Heat Pump

HEATING, COOLING & HOT WATER ALL IN ONE FLEXIBLE AND ECONOMICAL SOLUTION!

CALARKO

# Environmentally Friendly For a Green World

It meets cooling, heating and hot water requirements with high performance up to **5.05 COP energy efficiency**. It has a twin compressor. Heating outdoor air temperature operating range is -25~35°C, outlet water temperature range is 25 ~ 65°C.

ALARKO

With its advanced heat pump technology and powerful equipment, Flair's efficiency has been improved and thus its CO<sub>2</sub> emissions have been made much lower. It is an environmentally friendly product, a reflection of our social responsibility to protect the environment.

#### CALARKO Flair MONOBLOC

Flair is a type of multi functional monobloc air to water heat pump with DC inverter, which has an advanced technology that takes and raises the natural heat from the environment and transfers it back to the room. It doesn't only heat the room, but also supplies hot water required for domestic use at the same time..

Flair can also be used for cooling during the hot summer months. It offers an 'All in One' complete solution with heating, cooling, and hot water to meet your needs. You can benefit from the comfort and savings all year round!

#### Wide Operation Range

ALARKO

Operation	Outlet Water Temperature (°C)	Outdoor Dry Bulb Temperature (°C)
Cooling	5~25	-5~43
Heating	25~65	-25~35
Domestic Water	20~60	-25~43

# CALARKO Flair AIR TO WATER HEAT PUMP

# **Resulting Difference** Outstanding Features

- Easy assembly and low installation cost due to its compact structure
- Low GWP, higher heat transfer coefficient with eco-friendly R32 refrigerant
- Higher energy efficiency with twin Rotary compressors, water pump and fan motor with DC Inverter technology
- Wider outdoor temperature operating range in heating mode.
- Water temperature up to 60°C at outdoor operation temperature of -15°C with powerful heating capability
- Silent operation mode
- Manual defrost mode to defrost quickly
- Double zone control
- Floor protection
- 32 different preset climate curves
- Wi-Fi Controller
- Cascade system capable of controlling 6 heat pumps

#### CALARKO Flair MONOBLOC AIR TO WATER HEAT PUMP

Flair Monobloc Air to Water Heat Pump system is high-performance, smart and user friendly.

It has several user friendly functions, including holiday mode, silent mode, double zone control, daily timer, weekly timer, floor heating setting, and manual defrost mode.

It has cooling, heating, hot water, cooling + hot water and heating + hot water functions and can be connected to radiators, floor heating or different types of fan coils.

## Comfortable

# High Efficiency

Alarko Flair Heat Pumps provide high efficiency and silent operation with DC Inverter fan motor, compressor and water pump.

**High Efficiency DC Inverter** Water Pump

**New Design DC Inverter Twin Rotary** Compressor

- Wide operation range
- High pressure limit and high heating capacity at low outdoor temperatures
- Low operation vibration and noise
- Safe operation with durable and stable bearing and moving parts

#### **DC Inverter Fan Motor**

Stepless control BLDC fan motor

- Silent Operation
- Multiple Speed Control

CALARKO Flair MONOBLOC

## **Manual Defrost**

\*Representative

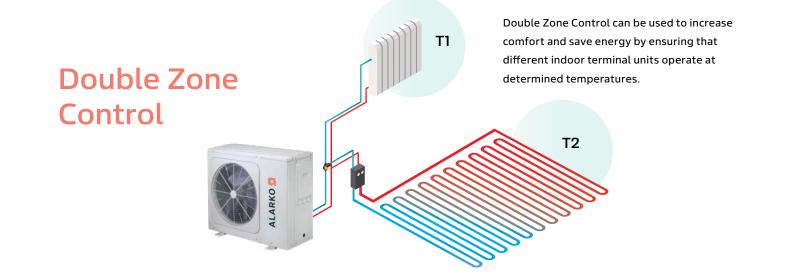

Manual defrost mode can be activated to quickly defrost according to the user's request.

#### **Compact Design**

It allows flexible installation with its compact dimensions.

# <complex-block>

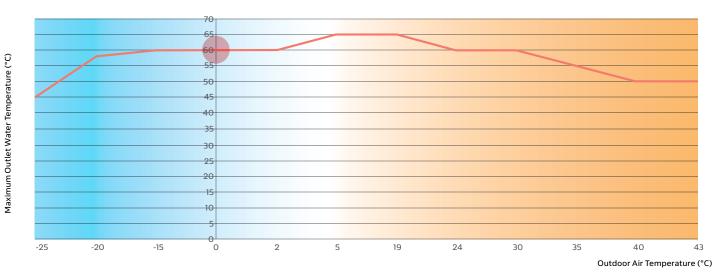

#### CALARKO Flair AIRTO WATER HEAT PUMP

60°0

# **Powerful Heating**

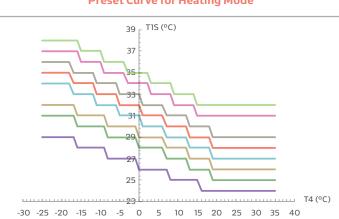

• In heating mode, leaving water temperature up to 65°C is provided.

• Outlet water temperature up to 60°C is provided at outdoor air temperature of -15°C.

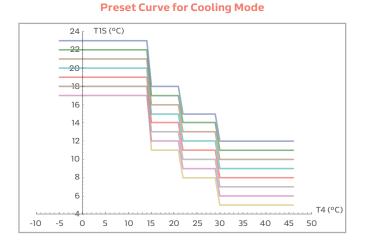

## **Preset Curves**

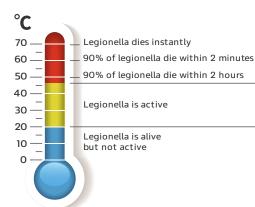

- The water temperature is automatically set depending on the outdoor air temperature.
- 32 preset curves for heating/cooling mode

#### **Preset Curve for Heating Mode**

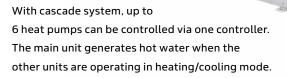

# Disinfection

The disinfection function is used to inactivate legionella bacteria with water at a temperature of 70°C to ensure healthy and safe use. This function is activated from the user interface.

#### Cascade System

ARKO

ARKO

ALARKO

Thanks to its versatile operation design, it can also get integrated into solar panels, electrical heaters, boilers and different heating solutions.

#### Wi-Fi Controller

ALARKO

With your smart phone or tablet, you have total control wherever you are. By downloading the mobile application to your phone, you can turn your system on and off remotely, change the temperature settings or turn on the holiday mode. Through the app, you can monitor your energy consumption and schedule weekly or daily.

#### **Combination Examples:**

#### **Different Operation Modes**

- Heating
- Cooling
- Water Heating
- Heating + water heating
- Cooling + water heating

Domestic Water Temperature Range Domestic Water: 20°C ~ 60°C

#### Wide Outdoor Air Operation **Temperature Range**

- Heating -25 ~ 35°C
- Cooling -5 ~ 43°C
- Water Heating -25 ~ 43°C

#### **Leaving Water Operation Temperature Range**

The recommended operation ranges according to different heating applications are as follows.

- Floor Heating 30 ~ 35°C
- Fan Coil 40 ~ 45°C
- Low-temperature radiators 40 ~ 50°C
